

Section 701 Legislative Requirements Reporting

Simpler online form rolling out in June!

Background

Since July 2023, the WaTech Oversight team has been working with agency partners whose projects are subject to [Section 701](#) to align on legislative requirements for some of the newer portions of Section 701.

What's Changing?

We'll be replacing the current Word form with a simpler online form with drop-down options.

Another key change: submitting this form will be mandatory for Gate Certification requests moving forward.

Why change?

Our goal is easier form submission for you and faster, data-driven status updates to leadership teams, Legislative partners, and the public. This change is part of our commitment to make the Oversight process more streamlined, consistent, and human-centered.

Why now?

Implementing this form in June ensures comprehensive reporting is in place prior to the new fiscal year (July 1).

Next Steps

1. Mid-April 2024 - Lean coffee session to walk through the new form using project examples. Invite coming soon -- please stay tuned!
2. June 2024 - new form rolling out!

Scope

All projects subject to Section 701 of the enacted budget or funded through the IT revolving account.
